

Cowater Drive on Sled

Description:

This “sled” is essentially two independent skis connected by a tow-bar at front. The sled is attached to the trailer by one pin at the front near the hitch. The wheels rest in pockets in the skis and are secured by a quick release chain. The sled is designed for quick and easy connection and disconnection.

Specifications:

Sled runners: Material: Welded aluminum with plastic runner bottoms.

Dimensions: Each ski is 92’’ long x 14’’ wide.

Plastic base : 14’’ x 3/8’’ with bolts at 2’’ o.c. along edges.

Tow bar: Lightweight angle frame with single pin in clevis connection.
Designed to allow each ski to float independently.

Skeg: Each ski is provided with a “drop-in” plate under the wheel which has a “skeg” protruding through a slot in the base to prevent sideways sliding.
