

# Cowater Water Blower

## **Description:**

Cowater's Water Blower is specially designed and fabricated by Cowater to function efficiently with Cowater's Water Haul Tank to deliver water into the fresh water holding tanks in homes. The design and construction is very robust to cope with field conditions.

## **Operation:**

To deliver water from the haul tank into the fresh water storage tank, the air hose is connected to the top of the water haul tank. The resulting pressure pushes the water into the holding tank.

## **Specifications:**

Blower motor: Ametek 3 stage blower Model 116765-13

Power: 120 Volt, 13.5 max amps.

Vacuum: 137.1 inches H<sub>2</sub>O (4.7 psi)

Casing: Dimensions: 14" H x 12" Dia.

Materials: PVC and UHMW plastic.

3/4" air hose with Camlock fittings, length 6 feet.
